BHAVARAJU BHANU TEJA

+91 9014830551 bhavarajub@gmail.com linkedin.com github.com

Education

Raghu Institute of Technology 2022 - 2026

Bachelor of Technology *in Computer Science and Engineering (GPA: 7.51 / 10.00)* *Dakamarri , Visakhapatnam*

- **Relevant Coursework:** Data Structures & Algorithms (DSA), Object-Oriented Programming (Python), DBMS & SQL,Machine Learning, Deep Learning (CNNs, RNNs), Natural Language Processing (NLP), Computer Vision.

Experience

Alfido Tech Jan 2026 – Mar 2026

- Completed a 2-month internship in AI at Alfido Tech, gaining practical exposure to AI concepts and real-world applications.
- Implemented Python-based solutions and enhanced problem-solving and analytical skills during the internship period.
- Worked on AI-related tasks and explored data analysis techniques to understand intelligent system development.

Projects

- **FitAI-Engine– Personalized Fitness System** | *Python*, *Flask*, *Artificial Neural Networks (ANN)*, *MCP*, *HTML*, *CSS*
  - Developed an AI-driven personalized fitness and diet tracking system for providing health and wellness recommendations.
  - Created an interactive web-based platform using Flask, ensuring seamless communication between frontend and backend systems
  - Developed RESTful backend APIs and integrated MCP server protocols for automated data exchange and external agent interoperability.

YouTube Webpage Clone | *: HTML*, *CSS*

- Developed a static front-end clone of the YouTube homepage with a responsive and user-friendly interface.
- Implemented modern CSS styling and JavaScript functionalities for interactive UI components and navigation.

AmazonCart System | *Java Script*,*HTML*,*CSS*

- Developed a dynamic e-commerce cart system with interactive product listing and cart management features.
- Implemented JavaScript-based shopping cart functionalities for adding, updating, and removing products with real-time price calculation.

Technical Skills

Languages: Python, Java(Basics), HTML, CSS
Backend & Web Frameworks: Flask, RESTful APIs, Model Context Protocol (MCP)
Machine Learning & AI:Artificial Neural Networks (ANN), Zero-Shot Text Classification, NLP, Object Detection (YOLOv7)
Data Science & Optimization: PuLP (Linear Programming), NumPy, Pandas, Scikit-Learn
Developer Tools & Environment: Visual Studio Code, Git, GitHub, Virtual Environments (venv)
